

BS 2000 Station Cabinet options

The TP Radio range of Base Station cabinets is designed to provide an efficient heat dissipation and for easy installation.

The **BK001, 002, 003 & 004** are designed for wall mounting, and the construction makes the cabinet weather proof and suitable for installation under almost any environmental conditions.

The **BK001** is a 50 cm high cabinet suitable for up to 40 W transmitter RF power output. It can hold a transceiver unit, a power supply, a duplex filter and e.g. a repeater control unit.

The **BK002** is a 70 cm high cabinet suitable for up to 100W transmitter RF power output. Otherwise, it is similar to the **BK001**.

The **BK003** is a 20 cm high cabinet suitable for up to 40 W RF power output. It can hold a transceiver unit and a duplex filter.

The **BK004** is like BK003 but due to the extended depth it can hold a transceiver with controller / GPS receiver or e.g. a transceiver and a PS004 power supply.

The **BK005** is a 2 HU, 19" rack cabinet with excellent heat dissipation due to the large heat sink.

The **BK005** can accommodate the same as BK001 & BK002
